

# Head ERC, China

Job ID  
REQ-10063581  
янв 04, 2026  
Китай

## Сводка

Lead Ethics, Risk, and Compliance (ERC) for China as an enterprise-minded, strategic partner who enables responsible growth with integrity. Shape and execute a fit-for-purpose ERC strategy that anticipates risks, embeds ethics into culture, and translates global standards (e.g., ABAC, DPDAI, COI) into practical, business-relevant solutions. Build a high-performing ERC team, strengthen trust with regulators and stakeholders, and design systems that make integrity a competitive advantage in a complex, highly regulated pharma environment.

## About the Role

### 1) Strategic Risk Leadership and System Design

- Set the ERC vision and strategy for China, aligned to enterprise objectives, external risk signals, and market context; integrate risk intelligence into business planning and innovation.
- Design and evolve fit-for-purpose programs, controls, and governance (feedback loops, metrics, root-cause learning) that drive resilient behavior and decision-making, not mere compliance checklists.
- Establish clear decision rights, escalation pathways, and risk appetite guidance in partnership with Country and International leadership.

### 2) Deep Technical Mastery and Assurance

- Provide authoritative guidance on complex, high-stakes compliance matters in the healthcare environment; tailor global standards (ABAC, DPDAI, COI) to China operations in a risk-balanced manner.
- Maintain functional credibility with regulators, auditors, and cross-functional leaders; ensure policies, procedures, and monitoring meet regulatory and ethical expectations.
- Oversee promotional/non-promotional activity governance; report appropriately to the Country Leadership Team.

### 3) Culture Shaping and Integrity Leadership

- Role-model integrity and cultivate a speak-up, accountable culture that embeds ethics into performance and everyday choices.
- Use systems, signals, and narrative to promote integrity beyond compliance; improve culture metrics and perception of trust, openness, and psychological safety.
- Define and deliver an annual local training plan (Code of Ethics, SpeakUp, Anti-Bribery, Doing Business Ethically, handbooks, relevant local regulations), ensuring onboarding and refreshers are practical and impact-oriented.

### 4) Business Partnership and Enablement

- Act as a trusted advisor and problem solver to business leaders; influence upstream decisions to enable innovation and speed with integrity.
- Translate risk guidance into practical, timely business decisions; co-create mitigation strategies with business units and functions without compromising ethical standards.
- Champion One ERC across divisions, Development, and Operations to ensure a consistent, scalable approach.

### 5) Risk Management, Monitoring, and Issue Handling

- Lead risk assessments, audits, monitoring, and reporting; use data and insights to prioritize remediation and strengthen controls.
- Ensure SpeakUp processes are well-communicated, fair, and effective; oversee corrective actions and remediation following investigations and committee decisions.
- Coordinate Business Continuity and Emergency Management (pandemic, disaster, earthquakes, CARBON) readiness.

### 6) Influence, Presence, and Stakeholder Engagement

- Build trust and influence across senior leadership, regulators, and industry bodies; communicate with clarity, presence, and calm under pressure.
- Engage in dialogue rather than directive; leverage storytelling and evidence to shape decisions.
- Represent the company in relevant committees and associations to synthesize public expectations, strengthen the environment, and enhance industry trust.

### 7) Team Leadership and Capability Building

- Attract, develop, and retain diverse ERC talent; allocate resources effectively and build future-ready capabilities.
- Inspire a shared vision and mission; lead through change with clarity, care, and accountability.
- Establish capability frameworks, coaching routines, and succession planning to elevate functional excellence.

## Key Performance Indicators

- **Strategic risk integration:** quality of ERC input into enterprise plans; timeliness and effectiveness of upstream influence
- **Program effectiveness:** reduction in repeat findings; closure cycle time for remediation; control health scores; data-driven insights implemented
- **Culture:** SpeakUp participation and resolution quality; trust and openness indices; training effectiveness (behavioral outcomes, not just completion)
- **Business enablement:** cycle time of risk guidance; stakeholder satisfaction; alignment of compliant speed-to-market with risk appetite
- **External credibility:** regulator/auditor feedback; industry engagement outcomes
- **Talent:** engagement scores, retention of critical roles, capability uplift and succession readiness

## Ideal Background

**Education** (minimum/desirable):

- University degree required, MBA degree preferred

**Experience:**

- A minimum of 10 years experience within ERC or adjacent regulated environments, with proven mastery of ABAC, DPDAI, COI, and local regulatory frameworks
- Demonstrated systems thinking, operational design, and data-informed program leadership
- Strong executive presence, influence without authority, and cross-boundary collaboration
- Track record in culture change, speak-up enablement, and ethical leadership
- Team leadership: talent strategy, coaching, and change leadership across complex matrices

**Why Novartis:** Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

**Benefits and Rewards:** Learn about all the ways we'll help you thrive personally and professionally.
