Job Title: Dir. DDIT US&I Sol.Del.JP & APMA

#LI-Hybrid

Location: Hyderabad, India

Relocation Support: Yes

What if you could shape how AI and technology create meaningful business impact across some of our most diverse and dynamic markets? In this role, you will connect global technology strategy with the evolving needs of Japan and APMA, turning business priorities into scalable, secure and human-centered solutions. You will partner with senior business and technology leaders to accelerate responsible AI adoption, simplify the technology landscape and strengthen operational excellence, while ensuring investments translate into measurable value. This is an opportunity to influence transformation at scale and help build an AI-enabled future where technology makes work simpler, smarter and more impactful.

About the Role

Key Responsibilities

- Define and execute AI-enabled technology, product and platform strategies aligned with business priorities and enterprise standards.
- Partner with business and technology leaders to identify demand and prioritize high-value digital, data and AI opportunities.
- Shape investment decisions by balancing business value, scalability, reuse, risk and total cost of ownership.
- Accelerate responsible adoption of Generative AI, automation and emerging technologies into practical, scalable business solutions.
- Own end-to-end delivery and lifecycle management of secure, resilient and high-performing products, platforms and services.
- Drive portfolio simplification, reducing technical debt while improving interoperability, data quality, standardization and reuse.
- Lead technology and AI-enabled transformation across Japan and APMA, strengthening adoption, operational excellence and measurable business outcomes.

Essential Requirements

- 10+ years' experience leading enterprise technology, product or solution delivery within complex, global organizations.
- Strong knowledge of Artificial Intelligence, Generative Artificial Intelligence, automation, data and emerging technology capabilities.
- Proven ability to translate business priorities into scalable technology strategies, solutions and measurable outcomes.
- Strong senior stakeholder management skills, influencing business and technology leaders across global and regional environments.
- Experience managing end-to-end technology portfolios, including investment, delivery, operations, governance, risk and value realization.
- Strong understanding of Responsible Artificial Intelligence, information security, data privacy, regulatory compliance and technology governance.

Desirable Requirements

- Experience leading technology transformation across diverse markets, ideally within Japan and Asia-Pacific, Middle East and Africa.
- Experience scaling Artificial Intelligence, Generative Artificial Intelligence or automation solutions from pilot to sustainable enterprise adoption.

Commitment to Diversity and Inclusion:

Novartis is committed to building an outstanding, inclusive work environment and diverse teams' representative of the patients and communities we serve.

Accessibility and accommodation

Novartis is committed to working with and providing reasonable accommodation to individuals with disabilities.
