Сводка

Provides strategic and broad team leadership on drug discovery, development projects and/or evaluation. Widely recognized as a strong team leader and/or expert from PK Science.

About the Role

Key responsibilities:

- Defines team goals, or provides matrix leadership, aligns and provides input to department strategy to project team or company initiative. Assumes responsibility for project, external evaluation or initiative and builds a clear connection to department and company goals.
- Successfully leads or operationalizes key scientific/technical/development areas from the discipline to advance department and company goals.
- May lead PKS sub-team(s) to generate, analyze, integrate data. Works with teams to identify potential project gaps and identifies mitigation plan (eg, resource needs, strategic alignment)
- Champions and advances new science relevant for project/department goals.
- Completes all required organizational trainings and requirements according to corporate timelines. Adhere in strict accord to the appropriate SOP and GxP guidelines.
- Leadership, Culture and Impact:
 - May develop and lead innovative interdisciplinary team, and/or leads through matrix using a well-developed internal and external scientific network.
 - Generates innovative strategy input and project concepts across multiple scientific/technical/development/evaluation domains
 - Links scientific strategy with specific objectives in novel areas through flexible matrix communities and/or direct team leadership and empowerment. Conducts long- and mid-term planning to identify specific, measurable impact on team objectives
 - Skilled in collaboration across PKS-internal or external business partners. Utilizes established networks and builds new network connections to bring new knowledge into the department/TM/BR/GDD and beyond.

Essential requirements:

- PhD / Pharm.D. level scientist with relevant experience in drug metabolism and pharmacokinetics or related biologic background
- 10+ years in the pharmaceutical industry and experience in drug discovery, development or a relevant environment (e.g. Clinical Pharmacology or Drug Metabolism and Pharmacokinetics).
- Knowledge of regulatory requirements and experience in dealing with regulatory authorities and experience conducting due diligence.
- Proficient with full range of techniques used in job and core area. Working knowledge of tools and processes used in drug design and development.
- Extensive library research skills and knowledge of problem solving techniques
- Extensive and in-depth knowledge of scientific discipline and relevant laboratory tools and procedures if responsible for lab associated activity
- Good understanding of management and training principles
- Sound and robust list of scientific publications and external presentations.
- Fluent oral and written Chinese and English

Desirable requirements:

- Extensive and in-depth knowledge of drug metabolism and pharmacokinetics including, pharmacology PK and PK/PD evaluation, Immunogenicity (for PTM roles), techniques, experience in working in project teams (preferably global) and knowledge of regulatory requirements.
- Demonstrated success of working in cross functional project teams (preferably global) and sound awareness of recent developments in drug development sciences.
