Imagine shaping the future of Finance through the power of Artificial Intelligence. As an AI Senior Expert at Novartis, you will build intelligent, enterprise-scale AI solutions that transform how financial decisions are made and how business insights are generated. Working at the forefront of Agentic AI, large language models, and advanced analytics, you will collaborate with global experts across Finance, Data Science, and Technology to create innovative solutions that automate complex processes, enhance decision-making, and deliver measurable business impact. If you are passionate about turning cutting-edge AI into real-world value, this is an exceptional opportunity to help redefine the future of digital finance.

## About the Role

### Key Responsibilities

- Design and deploy Agentic Artificial Intelligence solutions that transform finance planning, forecasting, and performance management.
- Build multi-agent systems that reason, retrieve information, execute tasks, and generate business recommendations.
- Develop Artificial Intelligence-powered analytics that convert complex data into actionable business insights.
- Integrate large language models into enterprise workflows while ensuring reliability, transparency, and governance.
- Design Retrieval-Augmented Generation architectures using structured and unstructured enterprise knowledge sources.
- Implement monitoring, evaluation, and testing frameworks to measure solution quality, accuracy, and business impact.
- Partner with cross-functional teams to deliver innovative Artificial Intelligence products that create measurable value.

## Essential Requirements

- Bachelor's or Master's degree in Computer Science, Data Science, Artificial Intelligence, Machine Learning, or related field.
- Minimum five years of experience developing Artificial Intelligence, Machine Learning, or enterprise software solutions.
- Proven experience building and deploying Artificial Intelligence agents or multi-agent systems in production environments.
- Advanced programming skills in Python and Structured Query Language for data-driven solution development.
- Hands-on experience with large language models, Retrieval-Augmented Generation, and enterprise Artificial Intelligence frameworks.
- Strong knowledge of cloud platforms, Artificial Intelligence operations practices, and scalable deployment architectures.

## Desirable Requirements

- Experience supporting Finance, forecasting, or business performance management use cases through Artificial Intelligence solutions.
- Knowledge of responsible Artificial Intelligence practices, model governance, and enterprise regulatory compliance frameworks.

## Benefits & Rewards

At Novartis, we're committed to reimagining medicine together - and rewarding the people who make it happen.

**Expected Annual Base Salary Range for role: €42,600.00 to €79,200.00**

The base salary offered is determined based on gender-neutral objectives, such as relevant skills, competencies and experience in accordance with the Novartis pay setting policy and upon joining Novartis will be reviewed periodically.

In addition to your base salary, you may be eligible for a performance-based bonus depending on certain performance parameters.

The rewards of being part of our team go far beyond base pay and incentives. We also offer a variety of competitive benefits in kind to help you thrive personally and

professionally, such as insurance plans, retirement plans, wellbeing resources and global recognition programs. In addition, we provide flexible and hybrid working options, where possible, and minimum 14 weeks paid parental leave.
