Сводка

As an intern, you will work closely with the product and delivery teams to support planning, tracking, and continuous improvement of critical IT systems.

About the Role

Major accountabilities:

- Build simple AI/GenAI applications (e.g., chat assistants, document tools) using Python and low-code platforms like Copilot Studio
- Experiment with automation tools to identify and prototype practical use cases, iterating quickly based on feedback
- Prepare and process data for NLP tasks such as text classification, entity extraction, and semantic search
- Assist in configuring and testing GenAI workflows, including RAG-style integrations with internal knowledge sources
- Contribute to automation solutions using Microsoft tools (Copilot Studio, Power Platform, etc.)
- Organize and structure information, prompts, and knowledge sources to enable effective AI usage
- Run evaluations for AI solutions, collect metrics and user feedback, and support continuous improvement
- Write clean, maintainable Python code, use Git, and follow team development and review practices
- Collaborate with engineers, data scientists, and domain experts while actively participating in team discussions and demos
- Document solution designs, experiments, issues, and recommendations, ensuring knowledge is reusable across the team

Key performance indicators:

- **Roadmap & Delivery Tracking:** Maintain accurate roadmap visibility and provide timely status reporting for **100% of assigned initiatives**.
- **Stakeholder & User Engagement:** Analyze user feedback and stakeholder inputs to support **prioritization and roadmap decisions**.
- **Process Improvement & Governance:** Identify and implement **2-3 improvements** in product tracking, documentation, intake, or prioritization processes.
- **Cross-Functional Collaboration:** Support project coordination, stakeholder alignment, and communication to ensure **key deliverables and milestones remain on track**
