Сводка

AI & Data Science Engineer – Operations (Junior), you will help design and build AI solutions that support our operations across Quality, Manufacturing, Supply Chain, and Procurement.

About the Role

As an intern, you'll work on real engineering problems that power GenAI platforms and tools. Your responsibilities may include:

- Support the team in building AI and GenAI applications (e.g., internal chat assistants, simple report helpers, document review tools) by implementing small features or fixes in Python under guidance.
- Help prepare and process text data and assist with basic NLP/document processing tasks such as entity extraction, text classification, or semantic search using existing libraries and examples.
- Assist in configuring and testing predefined steps in GenAI and RAG-style workflows that connect large language models with internal data sources, and document results.
- Contribute to straightforward ML and data science tasks (e.g., simple regression, classification, clustering), including data preparation and basic exploratory analysis.
- Run evaluation scripts or notebooks for AI/GenAI components, help collect metrics and qualitative feedback, and apply small improvements under direction from the team.
- Write clean, readable Python code with simple tests, use version control (Git), and follow team workflows for development and code reviews.
- Collaborate closely with senior engineers, data scientists, and domain experts, asking clarifying questions as needed, and participate in team ceremonies, demos, and knowledge-sharing sessions.

Why Novartis: Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together? <https://www.novartis.com/about/strategy/people-and-culture>

Benefits and Rewards: Learn about all the ways we'll help you thrive personally and professionally.
