Сводка

-Oversees security operations service line, technology governance and external / internal interfaces in accordance with service operations and management processes

About the Role

Key Responsibilities:

- Oversees identity and access management services offered to customers inside and outside of Novartis global IT Infrastructure.
- Oversees processes and resources delivering identity and access management services, ensuring the coordination of these teams in overall planning activities, service delivery, and issue resolution.
- Supports that all global supporting components of the service, including any associated SLAs, OLAs and UCs are managed as an integrated service.
- Supports and delivers overall continuous improvement, cost reduction and performance of the services.
- Assists with the regional and global monitoring, reviewing and reporting of performance against the SLA/OLA service and/or portfolio.
- Performs service reviews, qualifications and self assessments to e.g. ensure conformance with service-, quality-, audit, compliance, security and SOX requirements and industry best practices (Inhouse Operations, Third Party Suppliers and external Service Providers).
- Assists with the planning, (with Architecture, and Governance) to establish the overall services and the services delivery roadmaps.
- Ability to get involved with engineering and/or development activities to ensure timely delivery of objectives.

Essential Requirement:

- University working and thinking level, degree in computer science or comparable education and experience with 10 (or more) years of IT experience.
- Strong hands-on experience in Java, Spring Boot, React JS, Angular JS and REST API.
- Experience using AI development tools such as Claude Code, GitHub Copilot or similar AI-assisted development tools to assist with coding, debugging, testing, and documentation.
- Good knowledge of Hibernate and Oracle DB.
- Good understanding of Identity and Access Management concepts.
- Oracle Identity Manager (OIM) developer experience or experience in Oracle Access Manager (OAM) or Oracle Unified Directory (OUD) is added advantage.
- Strong problem-solving and analytical skills.Good communication and collaboration skills.
- Experience is managing 24*7 Engineering/developer activities. Experience with regulatory frameworks, such as SOX, GxP, or similar.
