#LI-Hybrid

Location: Kuala Lumpur, Malaysia

About The Role
In this role you will be responsible for the research and collection of threat in-formation from multiple sources, based on agreed intelligence requirements, and for processing this into timely, clear, accurate and actionable security intelligence, threat assessments, management briefings, security alerts, country risk assessments, source reports, multi-media presentations, workshops, training and other relevant security and awareness. The effect of which is to inform and enable business decisions regarding risk mitigation mechanisms and security controls, based on sound threat analysis and potential impact to the business OR responsible for Anti-Falsified Medicines governance, reporting and stakeholder management, including towards members of the Executive Committee of Novartis and externally.

About the Role

Key Responsibilities

- Operate within the intelligence cycle to identify, assess and communicate emerging security risks, geopolitical developments, crime trends, reputational risk patterns and disruptive events which may impact business operations.
- Produce high-quality threat assessments, executive briefings, presentations, and intelligence reports aligned to Global Security strategy, while ensuring accuracy, appropriate sourcing, and confidentiality.
- Translate complex intelligence findings into clear, actionable insights that support strategic decision-making, executive protection, business continuity, and enterprise risk management.
- Strengthen the threat intelligence operating rhythm with AI-enabled capabilities under established frameworks, to enhance strategic decision-making, risk-anticipation, executive protection, business continuity, and enterprise risk management, while retaining accountability for accuracy, interpretation, judgment and ethical use
- Conduct all-source intelligence collection and analysis to generate timely insights and deliver root-cause investigations, predictive analysis, horizon scanning output and maintain a high-quality, searchable corporate memory of intelligence activity.
- Support continuous learning and improvement of AI governance, prompt discipline, validation standards, source evaluation, and analytical tradecraft within the Intelligence COE
- Build strong partnerships with internal stakeholders and external intelligence and security networks.

Essential Requirements

- Proven extensive experience using artificial intelligence and augmented reasoning tools within intelligence or analytical environments.
- Bachelor's or Master's degree in a relevant discipline.
- Extensive professional experience in Intelligence and Security (both required) - combined settings include global security, counter-terrorism, law enforcement, military, commercial intelligence or related fields
- Experience of structured analytical techniques and intelligence analysis tools such as i2 Analyst's Notebook or equivalent platforms.
- Full proficiency in English AND Mandarin, is essential with a high standard of writing competence in English is required.
- Exceptional written, verbal, stakeholder engagement, and executive influencing skills.
- Advanced analytical and investigative skills, including open-source intelligence and social media intelligence research, with demonstrated ability to assess complex threats and translate findings into actionable recommendations.

Desirable Requirements

- Experience in an international / global environment and previous experience of the APAC region is desirable.
- Additional language capabilities form the region, particularly Mandarin
