Job Title: Manager, Corporate Affairs Intelligence – Narrative Intelligence

#LI-Hybrid

Location: East Hanover, United States

Relocation Support: This role is based in East Hanover, United States. Novartis is unable to offer relocation support: please only apply if accessible.

How are Novartis and its peers positioning themselves, and what does the evidence say about where each really stands? In this role, you'll analyze company and competitor strategies, financials, portfolios, pipelines, partnerships and communications. You'll show where competitors are strong or vulnerable and where whitespace exists, giving Corporate Affairs the context to shape Novartis's narrative.

About the Role

Key Responsibilities

- Uncover meaningful signals across company and competitor strategies, enterprise positioning and narratives; financials; product portfolios, pipelines and assets; partnerships, acquisitions and investments; scientific platforms and milestones; and leadership, investor and media communications.
- Provide company, competitor, pipeline, and industry context that helps Stakeholder Intelligence identify who matters and helps Emerging Issues assess the significance of external change, including competitive strengths, vulnerabilities, whitespace, and strategic signals.
- Maintain assigned areas of Corporate Affairs Intelligence's narrative intelligence foundation, preserving company, competitor, pipeline, asset, partnership, scientific, leadership, investor, media, and narrative evidence, context, assumptions, methods, findings, and analytical learning for reuse across briefs.
- Collect, structure, validate, and analyze quantitative and qualitative information from diverse sources, including traditional and social media, financial and corporate disclosures, policy and regulatory materials, scientific literature, stakeholder communications, public web content, blogs, forums, and other digital information environments, ensuring evidence is accurate, objective, traceable, and appropriate for the analytical question.
- Synthesize evidence into clear findings and evidence-based preliminary judgments and points of view, distinguishing supported conclusions from assumptions, uncertainties, and questions requiring further analysis or escalation.
- Apply AI-enabled workflows responsibly to improve analytical speed, rigor, and depth; validate AI-generated outputs against trusted evidence; and document improvements to prompts, methods, and workflows.
- Engage Corporate Affairs stakeholders at the project level to gather context, clarify how intelligence may be used, test understanding, and communicate findings while preserving analytical objectivity.
- Strengthen Corporate Affairs Intelligence's collective intelligence by producing objective, evidence-based work; communicating complex ideas clearly; seeking feedback; and collaborating across roles, workstreams, and functions.

Essential Requirements

- Bachelor’s degree or equivalent qualification.
- Experience analyzing company and competitor disclosures, investor materials and financial filings, pipelines and clinical milestones, scientific literature, partnerships and transactions, and leadership communications.
- Relevant experience in intelligence, research, insights or communications analytics.
- Proven ability to manage analysis from research planning through evidence collection, validation, synthesis and clear conclusions.
- Strong analytical and business acumen, connecting complex information with relevant strategic questions.
- Experience analyzing corporate disclosures, scientific literature, pipelines, media and other external sources.
- Hands-on experience using research, monitoring, data, intelligence or artificial intelligence-enabled tools and workflows.
- Ability to communicate complex findings objectively, distinguishing evidence from assumptions and uncertainty.
- Intellectual curiosity, attention to detail and confidence working independently and collaboratively in ambiguous environments.

Benefits & Rewards

The salary for this position is expected to range between $98,700.00 and $183,300.00 per year. The final salary offered is determined based on factors like, but not limited to, relevant skills and experience, and upon joining Novartis will be reviewed periodically. Novartis may change the published salary range based on company and market factors. Your compensation will include a performance-based cash incentive and, depending on the level of the role, eligibility to be considered for annual equity awards. US-based eligible employees will receive a comprehensive benefits package that includes health, life and disability benefits, a 401(k) with company contribution and match, and a variety of other benefits. In addition, employees are eligible for a generous time off package including vacation, personal days, holidays and other leaves.
