Key Responsibilities:

- Lead end-to-end safety strategy for assigned programs across development and lifecycle management
- Serve as scientific safety leader within global program, clinical, and trial teams
- Proactively identify, assess, and manage safety signals using data from all relevant sources
- Chair and drive Safety Management Teams to ensure timely, robust safety decision-making
- Own and deliver core medical safety documents, ensuring consistency and scientific rigor
- Guide benefit-risk evaluations and safety positioning across regulatory submissions
- Act as primary safety contact for health authority interactions and inquiries
- Partner cross-functionally to embed safety insights into development, labeling, and lifecycle decisions
- Ensure compliant documentation, tracking, and governance of all safety activities
- Mentor and guide colleagues, strengthening medical safety capabilities across the organization

Essential Requirements:

- Medical degree preferred; doctoral degree, pharmacy doctorate, or comparable healthcare qualification preferred
- 5+ years' experience in pharmaceutical drug development within a global pharmaceutical organization

- 2+ years of hands-on experience in drug safety/pharmacovigilance or medical safety roles
- Proven expertise in benefit-risk evaluation and clinical safety assessment across development phases
- Demonstrated experience preparing safety sections of regulatory submissions and periodic safety reports
- Strong track record of leading cross-functional, multicultural teams in a matrix environment
- Fluency in spoken and written English, with ability to communicate complex safety topics clearly

Desirable Skills:

- Oncology experience would be a strong advantage
- Working knowledge of additional major languages such as German, French, or Spanish
